SUMMARY

A dedicated and goal-oriented Computer Science graduate from MUST AJK with experience in software development, data handling, and secure system design. Skilled in web technologies and automation. Proficient in front-end technologies including HTML, CSS, JavaScript, WordPress, Bootstrap,delivering quality, scalable web applications. I blend creativity with logic — designing visually stunning interfaces and building robust backend systems that deliver real results.With expertise in React, Node.js, Python, and Machine Learning, I bring data-driven intelligence into modern web experiences.
I'm always eager to turn complex ideas into efficient, user-friendly digital solutions.

PROFESSIONAL EXPERIENCE

Front End Developer (Internee)
Moboroid Software Company 📅June 2023 – Dec 2023 📌Mirpur, AJ&K
- Collaborated with a team to develop and maintain the Front-end of the company's primary web platform.
- Created user-friendly interfaces utilizing HTML, CSS, JavaScript, and SCSS.

PROJECTS

Police Verification System - Final Year Project

- Designed a secure verification system for law enforcement.

- Implemented database-driven forms and automated report generation.

- Enhanced system efficiency by reducing manual processing time.

Find ReUnite, NewsApp

- Developed a web application to locate missing persons using image processing and rendering. Implemented a RESTful API backend and an intuitive frontend interface to enable efficient search and identification across areas..

Developed a dynamic web application using JavaScript, CSS, and HTML that integrates with external APIs to display real-time data. The project features a responsive user interface, allowing seamless interaction across devices. By leveraging API integration, the app fetches and displays updated information, providing users with a smooth and interactive experience.

Achievements & Certifications

- Contribution to Fakhra Research group to publish the Research paper in identifying and curing the stone present in human kidney

- Completed advanced courses in Machine Learning & AI Chatbot Development

- Developed multiple functional software/web applications

-2 years of Professional Experience in Development Field

Personal Attributes

-Strong analytical and problem-solving skills
- Quick learner with eagerness for deep, interdisciplinary research
- Team player and effective communicator
- Self-motivated and detail-oriented

EDUCATION

BS Computer Science (Dec 2020 -Oct 2024)
Mirpur University of Science and Technology
Mirpur-AJK-Pakistan

MARKS 2925/4400 CGPA 2.85/4

FSC Pre Engineering (2018 - 2020)
Islamabad Model College for Boys I-10/1
Islamabad-Pakistan
801/1100 73% B-Grade

Matric Science (2018)
Iqbal Secondary School Hurchos Shigar
 Gilgit Baltistan-Pakistan
913/1100 83% A+ Grade

Machine Learning Chabot Projects
Developed intelligent Chabot solutions using NLP and ML techniques.
Optimized for human-like responses and contextual understanding.

WordPress & Web Development Projects

Built multiple professional websites using WordPress & Next.js.

Integrated APIs, payment gateways, and dynamic dashboards

Technical Skills

Tools & Technologies

HTML CSS	Bootstrap	
JavaScript	React	RESTful API
Mongo DB	WordPress	Elementor
Tailwind	Git/GitHub	Python
Node.js	Express.js
